Sound Governing	

of a buffer, rain gardens, and solar energy.

Citizen Advisory Committee (CAC) Application

What are the strengths and/or qualifications you can bring to help this committee fulfill its purpose and duties? *

I (Louise Ludford) have studied wetlands and communicated with City of Minnetonka Natural Resource Specialists for the past 20 years about how to protect the north end of Purgatory Watershed. I am a former Special Education Teacher and have qualifications to communicate effectively with a variety of people, I have experience making data-based decisions, conduct research, and offer creative ideas to accommodate situations that may be sensitive. Arne Bjork is a Retired Navy man who through his leadership in the military has communication and leadership skills to convey information, direct plans, organize groups, and work effectively with individuals and fellow leaders. We consider ourselves environmentalists.

One of the roles of CAC members is to identify education needs in the community. What is one need, related to water, that you have seen? *

There is a need to gently educate residents of Saddlewood Patio Homes about the wetland buffer. A buffer is needed to keep water clean. The buffer works both above and below ground. Buffers are needed to clean water by filtering out and storing pollutants such as excess phosphorus. I am among 4 residents who stopped an Association project that would have dug up city property and change the water flow into the wetland. A need is to gently educate residents that Wetlands belong to all creatures and maintaining wetland health and vitality is an important environmental need. Being at the north end of Purgatory Watershed, there is a special responsibility to the land.

Are you able to commit to attending monthly meetings and special topic meetings as needed? *

Yes No

committ	u for your interest in becoming a member of the Citizen Advisory ee (CAC)!

Why are you interested in becoming a Citizen Advisor for the Watershed District? *

I now have the time and desire to contribute more actively in protecting our natural resources. I want to apply at a local level some of the experience and knowledge I have gathered in other civic arenas.

What do you hope to accomplish while serving on the committee? *

Protect the local natural environment and health of its watershed, by Helping educate the public Helping define policy consequences Becoming educated myself

	rengths and/or qualifications you can bring to help this committee fulfill its purpose and duties?
decade career of	or pursuits, loving nature and working to protect it, from Boy Scouts through support ot conservation groups to a 5 advancing water treatment technologies. orporate R&D for Osmonics> GE water in Minnetonka, in charge of developing, measuring and applying water
treatment technol	ogy for 30 years followed by 16 years independent consulting on same arena. Wa also key manager in charge of Regulatory Agencies, Academia researching this and industry trde groups (AWWA, WQA, NSF etc) I have sat on
USBureau Recrea	tion, US EPA panels and several standards groups. Peer reviewer for EPA Guides on water and wastewater ogies. Published 50+ scientific annd technology articles and many in trade magazines . So an understanding of
	d legal bureaucracies, regulation intersection with water issues and the published science.
One of the roles water, that you	of CAC members is to identify education needs in the community. What is one need, related to
	refects on the watershed, and clean water in general, from the inevitable but controllable discharge from
	ercial and industrial sources. Here I would focus most on household and what people should understand as they g
